Professional Summary

Results-oriented AI/ML Engineer with a solid background in machine learning, deep learning, computer vision, and agentic workflows. Experienced in building predictive models, developing autonomous AI agents, and deploying projects on cloud platforms like GCP and AWS. Proficient in Python, Tensor Flow, Pytorch, and workflow automation tools. Passionate about solving real-world business problems using AI technologies and deploying intelligent solutions at scale.

Professional Experience

Associate AI Engineer | JBS Americas and Europe *October 2025 – Present*

- Developing and integrating AI solutions to enhance operational efficiency in agribusiness and food processing sectors.
- Collaborating on the design and implementation of machine learning models for predictive analytics and process optimization.
- Assisting in the deployment of AI agents and automated workflows across international teams.
- Conducting data analysis and performance evaluations for AI-driven initiatives to ensure scalability and accuracy.

Agentic AI Engineer | LA Consulting (Pvt) Limited *May 2025 – October 2025*

- Contributed to the development of autonomous AI agents capable of complex decision-making and task execution.
- Assisted in integrating reasoning, planning, and interaction components to facilitate multi-step problem-solving.
- Participated in designing robust agent workflows for real-world use cases.
- Supported testing, debugging, and performance evaluation of agent behaviors to ensure reliability.

Officer HR Analytics | Tabros Pharmaceuticals *December 2024 – May 2025*

- Collected and analyzed operational and HR datasets using Excel and PowerBI to drive decision-making.
- Built dynamic KPIs and dashboards using Tableau and Excel for leadership reporting.
- Conducted statistical analysis and presented data-driven recommendations to improve workforce metrics.

AI & ML Trainee | Samsung Innovation Campus *October 2024 – December 2024*

- Built machine learning models using Scikit-learn, TensorFlow, and PyTorch.
- Gained hands-on exposure to Vertex AI, OpenAI APIs, and AI model deployment strategies.

Data Analyst Intern | Internn Craft April 2024 – July 2024

- Analyzed structured business data using Python and SQL and developed visualizations in Tableau.

Key Projects

AI Voice Agent (Synthflow & GoHighLevel) Designed and deployed a conversational AI voice agent using Synthflow to handle natural language customer interactions via phone. Integrated the voice system with GoHighLevel (GHL) to automate complex post-call workflows, including lead qualification, pipeline management, and appointment setting. This solution streamlined the customer engagement process by bridging real-time voice AI with CRM automation.

Automated Job & Lead Scraper (n8n, Apify, Clay) Engineered an end-to-end recruitment and lead generation automation pipeline using n8n workflow automation. Utilized Apify to scrape targeted job data from LinkedIn, enriched the dataset using Clay for deeper company and candidate insights, and integrated with Instantly to automate personalized cold email outreach. This system significantly reduced manual research time and optimized outreach conversion rates.

AI Business Analyzer & Content Generator Developed a comprehensive business intelligence tool that scrapes corporate websites to audit services, SEO performance, and competitor standing. The system provides AI-driven ratings and actionable improvement strategies. Additionally, it features a generative video module that automatically creates marketing video content tailored to the specific services and branding needs identified during the analysis.

Core Skills

- **Languages & Frameworks:** Python, SQL, C++, TensorFlow, PyTorch, Keras, OpenCV.
- **AI & Automation Tools:** n8n, Synthflow, GoHighLevel (GHL), Apify, Clay, Instantly, OpenAI API.
- **Cloud & Deployment:** Google Cloud Platform (GCP), Vertex AI, AWS EC2.
- **Data Visualization:** Tableau, Power BI, Matplotlib, Seaborn.

Education

Bachelor of Science in Computer Science

DHA Suffa University | Graduated March 2024

Certifications

- Google Data Analytics Professional Certificate
- Samsung AI and Data Science Certified
- Microsoft Azure AI Fundamentals
- Google Analytics GA4
